

Your organization has unique requirements. MIS Sciences Corporation analyzes your business and technology needs, and works with you to design a hosting solution to support those unique requirements. MIS can provide the software, hardware and services to implement an ideal solution, including servers, virtualization, cloud computing, storage, backup, hybrid environments, server monitoring and management, and system or database administration.

● Complete Flexibility

The equipment and staffing expertise you need are on-hand, making it easy to scale or blend the perfect infrastructure environment.

● Increased Savings

Best in class servers, firewalls and load balancers are provided. We manage vendors and maintenance, saving you on capital expenditures, upgrades and maintenance management.

● Total Care Customer Service

Seasoned, dependable engineers and hosting experts are available 24x7, and we extend a 100% customer satisfaction SLA.

● Reduced Overhead

Experienced and highly-trained database and systems administrators as well as other technical resources are on-staff, reducing your operations and human resources costs in hiring.

About MIS Sciences Corporation

Since 1996, MIS Sciences Corporation has been delivering comprehensive technology, colocation, and hosting services for enterprise and government customers of all sizes, from startups and Fortune 500 companies to Government agencies. MIS Sciences provides managed services and hosting, development and application management services, disaster recovery, and electronic vaulting; in geographically dispersed data centers for redundancy options and risk mitigation.

Complex Hosting
