

MSaaS Managed Solutions as a Service

Purchasing and refreshing equipment, managing and monitoring systems, and coordinating support and maintenance with a multitude of technology vendors; all are tasks that can distract from your core business and processes.

Leverage MIS Sciences Corporation's core competency - over twenty years of managed services, data center management and technology experience - to take those complex tasks off your hands, so you can focus on your business objectives.

Managed Solutions as a Service (MSaaS) frees you to utilize your valuable resources elsewhere, efficiently and effectively.

MSaaS gives you predictable fixed monthly pricing for a complete budget-friendly solution that includes all equipment, upgrades, management, monitoring, support and maintenance.

About MIS Sciences Corporation

Since 1996, MIS Sciences Corporation has been delivering comprehensive technology, colocation, and hosting services for enterprise and government customers of all sizes, from startups and Fortune 500 companies to Government agencies. MIS Sciences provides managed services and hosting, development and application management services, disaster recovery, and electronic vaulting; in geographically dispersed data centers for redundancy options and risk mitigation.

Managed Solutions as a Service (MSaaS)

MSaaS Benefits

- Stay current with the newest technology to lower operational costs and maximize performance, user satisfaction, and revenues.
- Choose your options: dedicated servers, cloud services, hybrid hosting, or FedRAMP certified cloud.
- Reuse your existing IP space by utilizing our fully meshed BGP networks, use our IP space, or both.
- Full GEO load balancing and redundancy across multiple highly dispersed data centers.
- 24x7x365 support, management and monitoring of your systems and network in an MIS Sciences data center by our highly trained staff of IT experts.
- Equipment provisioning, patching, upgrading, maintenance and support included.
- State-of-the-art equipment from trusted vendors like HP, Cisco, Fortinet, SonicWALL, Juniper Networks, NetApp, 3PAR, Dell, and VMware.
- Predictable, fixed, monthly costs simplify your budget and purchasing.
- Flexible terms and packages start with a 12-month term. End of contract options to upgrade, renew, or purchase equipment.
